Company activities, products and services:

SCHP CR represents the majority of the chemical industry of the Czech Republic in terms of turnover, profit generation and contribution to the state budget of the Czech Republic.

SCHP CR was founded in 1992 as a voluntary association of entities operating in the oil refining, chemical, pharmaceutical, rubber and plastics industries in areas related to activities such as manufacturers, research institutes, universities, professional associations, engineering, consulting, commercial, legal entities.

By 2022, SCHP CR associates 104 individual members and 4 collective members (Paint Manufacturers - AVNH CR, Cleaning Stations - CACS, Traders and Distributors - SCHOD CR and Circular Economy CAO bH).

SCHP CR supports Research, Development, Innovations via National Technology Platforms/Clusters as active member in: National Platform for Sustainable Chemistry, National Platform for Biomass for Chemical Industry and Transport, National Platform for Plastics, cluster CO2 Czech Solution Group.

We are looking for:

Establishing relationships with technology partners (know-how owners and potential users/investors) of recycling technologies, esp. “chemical recycling” focused on polymer treatment (plastics and elastomers).

Establishing relationships with technology partners (know-how owners and potential users/investors) of CCU (Carbon Capture and Use) technologies.

Establishing relationships with technology partners (know-how owners and potential users/investors) of “green hydrogen production”.

I would like to meet following partners, contacts:

Clients, partners for cooperation.
